

SEDRA JLILATY

Frontend & Mobile Developer · React & Flutter

jlilatysedra@gmail.com | github.com/sedrajilaty | Damascus, Syria — Available remotely

PROFILE

Computer Engineering student (Year 3) with hands-on frontend and mobile development experience across React and Flutter. Built several full-featured applications as academic and personal projects, including a charity management dashboard, a booking system, and a cross-platform Flutter marketplace app with real REST API integration. Currently expanding into fullstack development with Node.js. Comfortable working across the stack — from state management and API integration to UI/UX and bilingual (AR/EN) interfaces.

PROJECTS

Charity Management Dashboard — React · React Query · Tailwind CSS

2025 – 2026

- Built a complete React management dashboard for a charity organization as an academic/personal project.
- Implemented donation tracking (cash/in-kind/transfer), beneficiary management with geographic maps, and campaign progress tracking.
- Developed a Kanban volunteer board with drag & drop, multi-role user system, and PDF export for all reports.
- Added full Arabic/English bilingual support (RTL/LTR), dark/light mode, and React Query for smart data caching.

Cabin Booking System — React · Supabase · Tailwind CSS

2025

- Developed a hotel/cabin booking dashboard with authentication, booking status tracking, and a statistics dashboard.
- Integrated Supabase as the backend for real-time data, auth, and storage.
- Implemented dark/light mode and responsive design with Tailwind CSS.

King Booking App — Property Rental Platform — Flutter · Dart · Provider · BLoC · Dio · Laravel REST API

- Built a two-sided marketplace app with dual owner/tenant roles, role-based navigation, and a shared listing component driving different API endpoints per role.
- Integrated a real Laravel REST API using Dio, with a centralized network layer, token-based authentication, and request interceptors.
- Implemented the full booking lifecycle (create, approve/reject, cancel, rate) and multipart image uploads for property listings.
- Combined Provider (auth, bookings, notifications) with BLoC/Cubit (listings, theme, language) for state management across the app.
- Delivered bilingual (AR/EN) UI with RTL support and light/dark theming.

E-commerce Web App — React · JavaScript · REST API · Tailwind CSS

- Full-featured shopping app with user auth, product filtering, cart management, order tracking, and real-time notifications.

Travel Planner Web App — React · JavaScript · Maps API

- Interactive map-based app to track visited places and plan future trips with dates, notes, and location management.

Pizza Ordering Website — React · JavaScript

- Web app for browsing menus, managing a cart, and placing orders with a smooth, responsive UI.

SKILLS

Frontend: React · JavaScript · HTML · CSS · Tailwind CSS

Mobile: Flutter · Dart · Provider · BLoC/Cubit

Backend: Node.js (learning) · Supabase · REST API integration (Dio, Axios)

Languages (Programming): C++ · Java

AI & Tools: Cursor AI · Claude · AI Model Integration

DevOps: Git · GitHub · Vercel

EDUCATION

Bachelor of Computer Engineering

Year 3 of 5 · Damascus University, Damascus, Syria · 2022 – Present

Ranked 9th out of ~1,300 students in year cohort

LANGUAGES

Arabic: Native **English:** Good working proficiency
